

Grease Supply

ABNOX
Lubrication & Metering Solutions

The fine art

Lubricants are available in a wide range. Due to that, they set high demands on a feed pump.

The physical and chemical compositions as well as the variety of container dimensions are a great challenge to supply the lubricants.

For Smooth Operations

Centerpiece pump

To enable precise and accurate dosing, using the right lubricant pump is crucial. This means that the required parameters such as pressure and delivery rate can be guaranteed at all times.

The Grease Supply Systems from ABNOX ensure safe pumping.

Safe conveying

ABNOX has a wide range of products with high-quality Grease Supply Systems for all container dimensions and a wide variety of lubricants. From simple lubrication solutions to complex applications, ABNOX offers the right pump systems.

Because metered lubrication starts with safe pumping.

Metering Technology

ABNOX
Lubrication & Metering Solutions

Maintenance-free

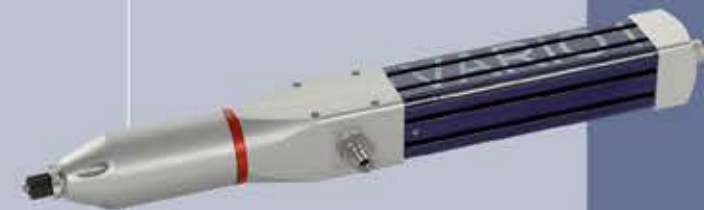

Vehicles, machines and systems need to be maintenance-free more often and for longer periods of time. The moving parts must be lubricated accordingly. This often involves the use of expensive lubricants that require a precise and clean one-time application.

For Smooth Operations

Safe & precise

The right amount of lubricant in the right place at the right time is central to minimize or prevent friction and wear. This is the only way to ensure a guaranteed service life without needing re-lubrication of the equipment and systems.

With system

ABNOX offers the right products for every dosing application. From individual Metering Valves to customized systems, we offer you everything from a single source. With our solutions, we support you in optimising your lubrication processes.

Because every drop is precious.

Lubrication Technology

ABNOX
Lubrication & Metering Solutions

Value preservation

Moving components often only function reliably long term with the appropriate lubrication. This is ensured by regular maintenance and service of machines and systems.

Regular maintenance sets high demands. The lubrication devices from ABNOX take this into consideration.

For Smooth Operations

Quality for professionals

Lubrication equipment from ABNOX is made of high-quality materials and with the highest precision. This guarantees years of continuous use without loss of performance even under the toughest conditions. Manageability and sophisticated ergonomics enable safe and fatigue-free work.

Customer Solutions

ABNOX
Lubrication & Metering Solutions

Problem solver

When it comes to lubrication and metering, the solutions should meet your exact requirements. Our wide range of modular components can be combined and further expanded according to your needs.

For Smooth Operations

Top engineering

For extraordinary challenges, we develop your individual, tailor-made solutions in our in-house engineering department: at the highest level, with the best quality, high precision and innovation.

Limitless

ABNOX has a wide product range with high-quality lubrication devices, grease pumps and filling devices. From construction machinery to cable cars to aircraft – the field of application knows no limits.

Because professionals choose ABNOX.
