ELECTRONIC SYSTEMS

Individuality from quantity of 1

We stand for extremely high flexibility, with respect to our customers and with our products. We ensure this high flexibility of our products by manufacturing everything ourselves wherever possible.

We use modern technologies as well as robust and durable components to guarantee our customers long-term planning security.

For us, working together as partners on an eye-to-eye level is a natural part of our business. You get exactly what you need from us.

Our customers benefit from this:

Touch Panel made in Germany
We develop and produce our products at our site in Memmingen. We pursue the approach of a particularly high vertical range of manufacture. This makes us much more independent of suppliers. You benefit from transparent processes and short supply chains.

Optimal service
We offer you professional project management. You always have a direct contact person. With our internal development department, technical questions can be clarified in the shortest possible time.

Safety through many years of experience
Our large development team has many years of experience in the development of Touch Panels. You will receive devices with perfectly matched components. Both for the hardware and for the software.

Modular construction kit for individual device configuration
Solutions without development effort
Individual device configuration:
- Diagonals: **7-24 inch**
- Performance:
  Monitor
  Web Panel
